📍 Nairobi, Kenya

★ Extra Field

## SUMMARY

Experienced Software Engineer adept in bringing forth expertise in the design, installation, testing, and maintenance of software systems. Equipped with a diverse and promising skill set. Proficient in various platforms, languages, and embedded systems. Experienced with the latest cutting-edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

## EXPERIENCE

03/2022 - Present

Nairobi

### Software Engineer

#### Jambopay, WebTribe Limited

- **Analytics Dashboard**  
Developed and implemented an analytics dashboard processing transactions from all company systems, providing real-time insights and revenue/profit counts. Integrated Kafka, Python Django, Apache Cassandra Database, Redis, and Angular 14 for the frontend application. Streamlined data to TV dashboards and mobile web for instant access and monitoring, achieving a 30% reduction in data processing time.
- **Disbursement System**  
Implemented backend API for a disbursement system using Redis, PostgreSQL 14, Django, and Node.js, with Angular for the frontend. Led system architecture design, collaborating with frontend developers using Angular. Successfully disbursed over 100 million KSH to various channels, improving disbursement process efficiency by 40%.
- **USSD Proxy Application**  
Designed and built a USSD proxy application in Nest.js and Node.js, facilitating easy configuration of USSD applications with validation checks. Enabled communication between Safaricom, Airtel, and Telkom for USSD requests and extensions.
- **Universal Bill Service**  
Designed and implemented a billing microservice in Python and Django, handling bills from various systems and integrating payment microservices. Improved reporting by 50%, providing enhanced analytics and reporting capabilities.
- **Events USSD**  
Developed a USSD application for viewing and purchasing event tickets, increasing ticket sales by 20%. Integrated with Jambolife ticketing and events web system for seamless ticket purchase.
- **Kenya Copyright Board Tax Remittance Portal**  
Built a system with integration to Jambopay Checkout and bank payments, allowing traders to declare and pay taxes on imported goods. Currently performing user acceptance tests.
- **Kenya Port Authority: Ferry Payment**  
Developed a revenue collection system using Nest.js and PostgreSQL for efficient gate control operations. Integrated renowned payment providers such as M-Pesa and eCitizen for secure transaction processing. Raised daily collections from under 6000 USD to about 23000 USD per day, achieving 100% cashless collections through M-Pesa.
- **Kenya Airports Authority: Revenue Collection**  
Led a team of 4 developers in the development of the revenue collection system utilized across all airports and airstrips in Kenya. Developed the USSD application handling transactions through the Jambopay wallet and eCitizen (M-Pesa STK Push). Successfully improved daily collections to over 2 million KSH each day, enhancing revenue generation efficiency and accuracy. Developed the enforcement Android POS application to handle validation of transactions for parking fees, by enforcers.

02/2021 - 03/2022

Machakos

### Software Engineer

#### BeanSoft

- A software Development Company involved in designing, developing and implementing a crypto-exchange platform integrated with Dollar Cost Averaging Bot and Grid bot
- Technologies: Python, Flask, Redis, Celery, Binance Api, Swagger, Postgresql, Nginx, Docker, Vuejs, Github, CentOS Server

## EXPERIENCE

2015 - Present

Eldoret

### Designer/ Software Engineer

#### Art Touch Enterprise

- I wear multiple hats as a designer and software developer. I create artwork for puzzles while also automating our processes through custom software solutions. My key projects include building an e-commerce platform (website and app) for our puzzles and learning resources and developing an inventory and business management system. I also contribute to marketing efforts. This diverse role allows me to blend creativity with technical skills, driving innovation in educational products and enhancing operational efficiency.

10/2020 - 01/2021

Machakos

### Software Development Intern

#### BeanSoft

- Designed and developed 5 key features for an automated Telegram Binance Trading Bot.
- Achieved a 20% reduction in trade execution time by developing a Python back-end application for Binance.

05/2019 - 05/2019

Nairobi

### Software support intern

#### United States International University (USIU)

- Involved in installing and managing Active Directory user account delegated roles
- Assisting in managing all systems and software packages
- Planning for upgrades and software changes to increase efficiency

## EDUCATION

09/2018 - 09/2021

Machakos, Kenya

### Bachelor of Science Mathematics and Computer Science

#### Machakos University

- Specialized in Applied Mathematics with Computer.

## TRAINING / COURSES

### Machine Learning and Artificial Intelligence

Coursera May 2023 - Present

### Software Architecture: Patterns for Developers at LinkedIn

LinkedIn, June 2022

### Google Africa Development Scholarship - GADS 2020

Google, Pluralsight. May 2020 — Sep 2020

### Big Data Engineer Mastery Award

IBM Big Data, May 2019 - Jul 2019

### Advanced Java Training

Moi University, Nairobi Campus (Hi-Train). Feb 2019

## SKILLS

|                             |            |               |                  |                 |                   |                 |        |          |
|-----------------------------|------------|---------------|------------------|-----------------|-------------------|-----------------|--------|----------|
| Active Directory            | TypeScript | Angular       | JavaScript       | Nestjs          | Nodejs            | Go              | Linux  | Tailwind |
| Docker                      | Django     | Flask         | Go Lang          | Html & css      | Adobe Illustrator | Adobe Photoshop | Python |          |
| Algorithms                  | Angular    | Apache        | Apache Cassandra | Apache Hadoop   | Api               | Arduino         |        |          |
| Artificial Intelligence     | Azure      | Azure Devops  | Big Data         | Blockchain      | Caching           | Cassandra       |        |          |
| Celery                      | CentOs     | Configuration | Css              | Data Structures | Database Systems  | Devops          |        |          |
| Experience Design           | Figma      | Git           | Github           | Google Maps     | Gps               | GraphQL         | Hadoop | Java     |
| Natural Language Processing |            |               |                  |                 |                   |                 |        |          |

## PROJECTS

### Sahihi

📅 2020

Designed and developed a integrated online system to facilitate the signing and verifying of documents. Developed an API for integration.

## PROJECTS

### Bio-Informatics Neural Network

📅 2020

Designed and implemented a neural network to group similar DNA Sequences using feedforward and backpropagation algorithm.

### PancakeSwap Trading Bot

📅 2021

Implemented a telegram bot to track and buy new tokens on the binance smart chain then sell the tokens on user defined profit percentage.

### Binance Telegram Bot

📅 2022

Implemented a telegram bot trade on binance exchange both manual trading and automated trading using trading view webhooks

### TechMart, Commerce Website - Frontend

📅 2019

Implemented a shopping cart and a responsive application frontend.

## MOST PROUD OF

### Employee of the Year, Recognition Award, Dec 2023

By **JamboPay, WebTribe Limited**

Honored with a Recognition Award for consistently going the extra mile and demonstrating exceptional dedication in the workplace.

### Konza Technopolis, Tech Hackathon, Nov 2020

By **Konza City, Kenya**

Led a team of 5 members in developing a vehicle accident response system utilizing Arduino, GPS modules, impact sensors, tilt sensors, vibration sensors and integrated with Google Maps.

Achieved the 5th position in the competition, showcasing effective teamwork, problem-solving, and technical skills.

### Machakos University Chancellor Scholarship 2019

By **Mr. James Mworio, Chancellor of Machakos University**

I was awarded 1 year academic scholarship for Excellent performance in STEM study

### Machakos University Chancellor Scholarship 2018

By **Mr. James Mworio, Chancellor of Machakos University**

I was awarded 1 year academic scholarship for Excellent performance in STEM study

## VOLUNTEERING

### Technical Mentor

**FIRST Global**

📅 01/2021 - 12/2021

- Offered guidance and support to Team Kenya 2021 in the development of projects encompassing Robotics, Arduino, and STEM disciplines for competition.
- Provided mentorship and technical expertise to students in constructing a CubeSat Prototype, fostering skill development and project realization.

### Graphic Designer | Sound Engineer

**Talanta Ministries, Machakos**

📅 09/2016 - Present

- Designed event posters and weekly announcements for church activities, ensuring effective communication and engagement with the congregation.
- Set up and managed the sound system during church services and meetings, ensuring seamless audio operations.
- Volunteered to teach children during the Daily Vocational Bible School held every holiday, contributing to their spiritual and educational development.

## PASSIONS

Guitar

Tinkering with Electronics

Working with children

Reading Personal Development Books
